See check-in trends

Revision 2026-10-10

See how often your athletes check in over the last 7, 30 or 90 days.

The **General** tab on **Check-in** opens first and shows how often athletes check in.

Read your trends

1. Pick a **Time range**: **Last 7 days**, **Last 30 days** or **Last 90 days**.
2. To see certain groups only, check boxes under **Rosters**. Leave them unchecked for your whole team.

Read the four cards:

- **Total check-ins**, compared with the period just before it.
- **Athletes checking in**, out of your active athletes.
- **Average per athlete**.
- **Average per event**.

Athlete check-in frequency groups athletes into **No check-ins**, **1 check-in**, **2–3 check-ins** and **4+ check-ins**. Select **Bar** or **Pie** to change the chart.

Recent event attendance lists up to eight recent events with their check-in counts.

The page keeps your choices in its web address, so you can bookmark the view. For tables you can download, see Attendance, weigh-in and descent reports.
